

C-Gen 10 Position Statement on the Appropriate Use of Diagnostic Ultrasound

Position Statement of The Australasian Society for Ultrasound in Medicine (ASUM), RANZCOG and the Royal Australian and New Zealand College of Radiologists (RANZCR)

The Australasian Society for Ultrasound in Medicine, the Royal Australian and New Zealand College of Obstetricians and Gynaecologists and the Royal Australian and New Zealand College of Radiologists are committed to ensuring the maintenance of the highest standard of medical care for pregnant women.

Diagnostic medical ultrasound technology offers enormous benefits in terms of the provision of useful diagnostic information so that pregnancy may be better assessed and managed, with optimum outcomes for mothers and babies achieved.

The use of diagnostic medical ultrasound equipment requires regulation such that its primary use is for the purpose of medical diagnosis. Such regulation should require that the diagnostic ultrasound equipment usage be restricted to appropriately qualified health care professionals.

Usage of such equipment should conform to the guidelines produced by the Australasian Society for Ultrasound in Medicine.

Appropriate regulation by appropriate authorities regarding the sale, distribution and use of diagnostic ultrasound equipment should be formulated with a view to ensuring that this technology continues to assist clinicians in the management of pregnancy, thereby optimizing outcome for mothers and babies.

Disclaimer

This College Statement is intended to provide general advice to Practitioners. The statement should never be relied on as a substitute for proper assessment with respect to the particular circumstances of each case and the needs of each patient.

The statement has been prepared having regard to general circumstances. It is the responsibility of each Practitioner to have regard to the particular circumstances of each case, and the application of this statement in each case. In particular, clinical management must always be responsive to the needs of the individual patient and the particular circumstances of each case.

This College statement has been prepared having regard to the information available at the time of its preparation, and each Practitioner must have regard to relevant information, research or material which may have been published or become available subsequently.

Whilst the College endeavours to ensure that College statements are accurate and current at the time of their preparation, it takes no responsibility for matters arising from changed circumstances or information or material that may have become available after the date of the statements.
