# RANZCOG/RACGP Joint Statement on Pap smears

In Australia and New Zealand the Pap smear remains the most cost-effective screening test for reducing the incidence and mortality of cervical cancer by the detection and subsequent treatment of its precursors.

There are no other tests at the present time, which have been shown to have a justifiable cost benefit and their increased usage cannot be supported at the current time from a public health perspective. 'It is important to note that this is a rapidly evolving area. Further developments in the existing devices, as well as the emergence of other technologies, are likely to change the current situation in the near future.'<sup>1</sup>

There is a need for large-scale Australian trials of any new technologies to determine their effectiveness and cost benefit. To that end the College would be willing to participate in such trials.

The College encourages all doctors and other health professionals to promote and perform high quality, regular Pap smear at the nationally recommended intervals. General Practitioners have a pivotal role in the recruitment of women who have never been screened or are under screened and encouraging all eligible women to participate in the program.

## Disclaimer

This College Statement is intended to provide general advice to Practitioners. The statement should never be relied on as a substitute for proper assessment with respect to the particular circumstances of each case and the needs of each patient.

The statement has been prepared having regard to general circumstances. It is the responsibility of each Practitioner to have regard to the particular circumstances of each case, and the application of this statement in each case. In particular, clinical management must always be responsive to the needs of the individual patient and the particular circumstances of each case.

This College statement has been prepared having regard to the information available at the time of its preparation, and each Practitioner must have regard to relevant information, research or material which may have been published or become available subsequently.

Whilst the College endeavours to ensure that College statements are accurate and current at the time of their preparation, it takes no responsibility for matters arising from changed circumstances or information or material that may have become available after the date of the statements.
