GYNAECOLOGISTS**

IN-HOSPITAL CLINICAL ASSESSMENT RATING FORM

MODULE 3: COLPOSCOPY AND THE TREATMENT OF CERVICAL DISEASE

NAME OF TRAINEE:

HOSPITAL:

After observing the candidate with at least six patients, please indicate your rating for each of the following attributes by placing a tick in the small box at the bottom right of the appropriate response.

1 Taking a history

Obtained all of the pertinent information in a logical, systematic and orderly manner. A <input type="checkbox"/>	Obtained all of the relevant information but not always in a logical, systematic and efficient manner B <input type="checkbox"/>	Obtained most of the pertinent information, but not always in a logical manner, systematic and efficient manner C <input type="checkbox"/>	Obtained most of the relevant information, but failed to collect some key data D <input type="checkbox"/>	Obtained information in a haphazard unrelated fashion, resulting in omission of pertinent data. E <input type="checkbox"/>
--------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------

2 Explanation of colposcopy procedure

Before colposcopy, effectively explained the actual procedure to all patients A <input type="checkbox"/>	Explanation provided to all patients before colposcopy but the quality of explanation was inadequate for some patients B <input type="checkbox"/>	Explanation provided to all patients before colposcopy but the quality of explanation was inadequate for most patients C <input type="checkbox"/>	Omitted explanation of the procedure before colposcopy of some patients D <input type="checkbox"/>	Omitted explanation of the procedure before colposcopy of some patients E <input type="checkbox"/>
-----------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------

3 Positioning the patient

Positioning of patient and speculum was skilful and effective for all patients A <input type="checkbox"/>	Positioning of patient and speculum was skilful and effective for all patients but was clumsy for one patient B <input type="checkbox"/>	Positioning of patient and speculum was skilful and effective for all patients but was clumsy for at least two patients C <input type="checkbox"/>	Positioning of patient and speculum was ineffective for some patients D <input type="checkbox"/>	Positioning of patient and speculum was ineffective for all patients E <input type="checkbox"/>
------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------

4 Use of the colposcope

Obtained clear, focused view of the patients cervix in all patients A <input type="checkbox"/>	Obtained clear, focused view of the patients cervix in all but one of the patients B <input type="checkbox"/>	Obtained clear, focused view of the patients cervix in all but two of the patients C <input type="checkbox"/>	Did not obtain a clear, focused view of the cervix in most patients D <input type="checkbox"/>	Did not obtain a clear, focused view of the cervix in any patient E <input type="checkbox"/>
-------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------

5 Colposcopic assessment

Colposcopic assessment in all patients was accurate and complete A <input type="checkbox"/>	Colposcopic assessment in one patient had a minor inaccuracy or omission B <input type="checkbox"/>	Colposcopic assessment in at least two patients had minor inaccuracies or omissions C <input type="checkbox"/>	Colposcopic assessment in at least one patients had major inaccuracies or omissions D <input type="checkbox"/>	Colposcopic assessment in more than one patient had major inaccuracies or omissions E <input type="checkbox"/>
----------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------

6 Colposcopically directed biopsy

Performed a skilful, effective biopsy in all appropriate patients and obtained haemostasis A <input type="checkbox"/>	Performed an effective but sometimes clumsy biopsy in all patients and obtained haemostasis B <input type="checkbox"/>	Performed an effective biopsy in all appropriate patients but failed to obtain haemostasis in at least one patient C <input type="checkbox"/>	Performed an ineffective biopsy in one patient and/or had difficulty in obtaining haemostasis in most patients D <input type="checkbox"/>	Performed an ineffective biopsy in more than one patient E <input type="checkbox"/>
------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------

7 Explanation of treatment

Before treatment effectively explained the procedure used to all patients, inc. likely patient experience & post treatment care A <input type="checkbox"/>	Before treatment effectively explained the procedure used to all patients but the explanation was occasionally poor B <input type="checkbox"/>	Before treatment effectively explained the procedure used to all patients but the explanation was often poor C <input type="checkbox"/>	Omitted explanation of the procedure used before commencing treatment of some patients D <input type="checkbox"/>	Omitted explanation of the procedure used before commencing treatment of all patients E <input type="checkbox"/>
---------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------

8 Treatment technique

Technically skilled in the treatment of all those patients undergoing treatment for cervical disease A <input type="checkbox"/>	Treatment for all patients for cervical disease was apparently effective but not always skilful B <input type="checkbox"/>	Treatment of one patient for cervical disease was of dubious effectiveness C <input type="checkbox"/>	Treatment of more than one patient for cervical disease was of dubious effectiveness D <input type="checkbox"/>	Treatment of most patients for cervical disease was of dubious effectiveness E <input type="checkbox"/>
------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------

9 Patient record

Record of clinical findings complete and concise for all patients A <input type="checkbox"/>	Record of clinical findings complete for all patients but not always concise B <input type="checkbox"/>	Record of clinical findings for one patient had minor inaccuracies or omissions C <input type="checkbox"/>	Record of clinical findings for at least two patients had minor inaccuracies or omissions D <input type="checkbox"/>	Record of clinical findings for at least one patient had major inaccuracies or omissions E <input type="checkbox"/>
-------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------

10 Counselling

Consistently detected and was responsive to concerns and anxieties of patients A <input type="checkbox"/>	Consistently detected the concerns and anxieties of patients but occasionally failed to respond effectively to them B <input type="checkbox"/>	Consistently detected the concerns and anxieties of patients but often failed to respond effectively to them C <input type="checkbox"/>	Occasionally failed to detect the concerns and anxieties of patients D <input type="checkbox"/>	Apparently unaware of the concerns and anxieties of patients E <input type="checkbox"/>
--------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------

This assessment is based on observation of the candidate with ____ (no.) patients over a period of ____ hours.

A pass in the whole module can only be given if the candidate achieves a rating of at least B for EACH skill.

The candidate has **PASSED** ♣ **NOT PASSED** ♣ this assessment.
